

Erin Gleason **L**ane

VP OF COMMUNICATIONS

@ **F**ounders **F**und

27th July 2021 to 2nd September 202

By Nick Ray Ball

Dear Erin,

I hope you're having a super fab week.

Please see in the graphic below; The Ten Technologies:

For a well-organized presentation of all technologies go to our main website www.S-World.org and see the drop-down menu; Technology.

You will need to log in, your log in details are:

Username: Erin-Gleason-Lane

Password: Communications

In case you wish to see more before you log in (in case you worry this is some scam letter

trying to get you to log in for some malicious intent here are 4 previous websites that are not password-protected:

Here are some of the earlier websites that are not private

<https://www.capevillas.com> (2000)

<http://americanbutterfly.org> (2012)

<https://network.villasecrets.com> (2015)

<https://www.angeltheory.org> (2016)

<https://www.supereconomics.ai> (2019)

Further to this confidence-building is the printed book 64 Reasons Why that I will send you as soon as you give me an address, this book is important for its content but also to see the quality of the marketing material to be sent to others.

PART 1

Initially and in answer to Peter Thiel's Zero to One Chapter 14 quote. **"But a valuable business must start by finding a niche and dominating a small market."** We see Technologies 1 to 4 which have quite a story, were just waiting on one update to the CMS on technology 1. S-Web and then I can present them via video.

Our initial market is properties valued at over \$10 million for rent and sale at a higher price than usual due to what we call prestige marketing. A great deal of these systems have been developed over the past two decades, we have a working prototype, that requires only medium effort to scale from its current market of Africa (specialist in Cape Town and Safari's) to a global product specialising in about 300 locations.

Technologies 1 to 4 are sometimes grouped together as; The S-World Platform.

For now, here are some relevant links, in the format I use for the S-World.org website.

11.78__Technologies 1 to 6 – BASIC (1088 Words)

[http://www.the10technologies.com/11.78__SuEc.1__Technologies-1-to-6__BASIC__Basic__\(1088-Words\)__\(31-Dec-2020-to-1-Feb-2021\).pdf](http://www.the10technologies.com/11.78__SuEc.1__Technologies-1-to-6__BASIC__Basic__(1088-Words)__(31-Dec-2020-to-1-Feb-2021).pdf)

8 Pages | 1,088 Words | 31st Dec 2020 to 1st Feb 2021 ★★★★★ 🖱️

11.77__S-Web™ Special Project & Technology 1 – Villa Secrets and Experience Africa

[https://www.supereconomics.ai/11.77__SuEc.1-3__S-Web__Special-Project-1__Villa-Secrets-and-Experience-Africa__\(5-Sep-2019-to-1-Feb-2021\).pdf](https://www.supereconomics.ai/11.77__SuEc.1-3__S-Web__Special-Project-1__Villa-Secrets-and-Experience-Africa__(5-Sep-2019-to-1-Feb-2021).pdf)

22 Pages | 3,313 Words | 5th Sep 2019 to 1st Feb 2021 ★★★★★ 🖱️ 🖱️

11.79__Technologies 1 to 6 – S-Web and S-World Villa Secrets

[http://www.the10technologies.com/11.79__SuEc.1__Technologies-1-to-6__S-Web_and_S-World-Villa-Secrets__\(2549-Words\)__\(31-Dec-to-1-Feb-2021\).pdf](http://www.the10technologies.com/11.79__SuEc.1__Technologies-1-to-6__S-Web_and_S-World-Villa-Secrets__(2549-Words)__(31-Dec-to-1-Feb-2021).pdf)

22 Pages | 2,549 Words | 31st Dec 2020 to 1st Feb 2021 ★★★★★ 🖱️

And here is the complete book written in 2017

06.21__Cape Villas & The Villa Secrets' Secret – Complete Book

[https://www.angeltheory.org/06.21__SuEc.1__Cape-Villas_and_The-Villa-Secrets-Secret__Complete-Book_\(Summer-2000-to-Aug-2017\).pdf](https://www.angeltheory.org/06.21__SuEc.1__Cape-Villas_and_The-Villa-Secrets-Secret__Complete-Book_(Summer-2000-to-Aug-2017).pdf)

355 Pages | 103,809 Words | Aug 2000 to 12th Aug 2017 ★★★★★ ✨ ✨ ✨

I call Technologies 1 to 4 The S-World Platform, I want different co-founders and investors in each technology, independently, but right now, with Founders Fund in my sights and the doors opened by that network I am happy to discuss The S-World Platform under the 20% benchmark mentioned in Peter's book.

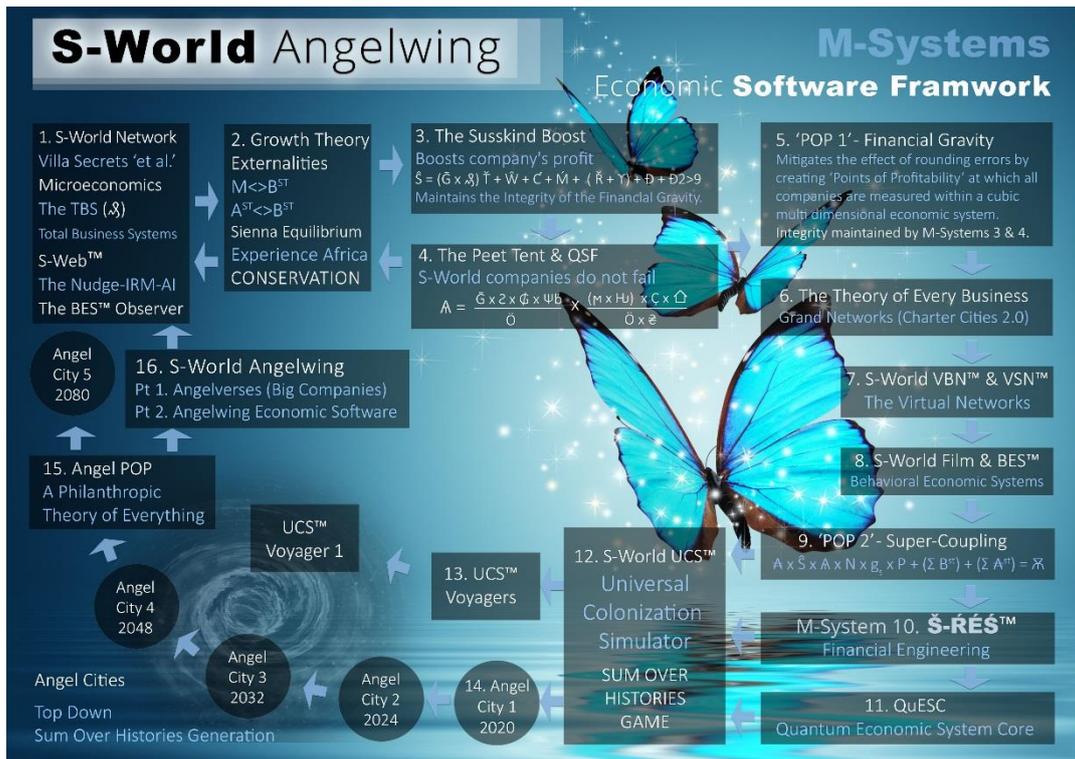

Or on a variation of the concept, I am also willing to do a deal to manage my money, but at 12.5%. Working in this way means you would have a share of income from all 10 technologies.

So, let's see what that looks like, Technologies 5 and 6 sit on top of the S-World Platform. Technology 5. S-World VSN's ideal co-founder is Mark Zuckerberg alongside someone from Google, but I can't decide who. VSN stands for Virtual Social Network, you can check it out, but I'm pretty confident I created the world first commercial virtual tour back in 2002, so I've had a lot of time to think about how to make money from it. Maybe it can be the last mover and take over the MLS, this would give us a commission of between 0.5% and 1%, on I think, most houses sold in the USA. This is however just a finger's-crossed sideshow, there are definite city building projects that require a virtual world, first, we need to do a deal with Will Wright from the SIMS and SIM City. And add to the architecture of Stefan Antoni.

Technology 6. S-World UCS is well, um, err, well not to sound immodest – but it's a time machine! It can't take us to the future, but it can change the future for the much, much better. UCS is fundamentally all technologies as a game, indeed many games from Civilization to Football Manager, all are relevant in this incredibly complex technology.

See the graphic below M-Systems 10 to 16 show S-World UCS, here is a link for more details

<http://www.angeltheory.org/m-systems/part-2/the-s-world-ucs-m-systems>

Or going back to 2012 have a look at the two following links

AB Chapter 7. S-World VSN: www.americanbutterfly.org/S-World-2012

AB Chapter 8. S-World UCS: www.americanbutterfly.org/S-World-UCS-2012

Technologies 5 and 6 are going to be expansive, but are necessary to get the most out of Technology 7 which is what it's all about. The reasons why I have come to Founders Fund to seek out Peter Thiel's advice and ultimate praise for my work on the monopoly equation called Š-ŘÉS™ or more recently its determined version Š-ŘÉS™2021—Δ≥ÉL.

Don't panic, it's really not that complicated.

PART 2 – Technology 7. Š-ŘÉS™2021—Δ≥ÉL.

"It's really not that complicated" was a phrase written into a number of the more recent books, for Peter Their and Paul Romer's attention. But it's equally applicable to any smart alert person with basic accounting knowledge. So I refer you to Doc ID:

11.37_S-RES Monopoly Equation for Erin Gleason Lane

11.11_SuEc.2_S-RES-BASIC + Cash Flow and Discounted GDP from 2024 to 2080 + Big Plans Must be Simple [https://www.supereconomics.ai/11.37_S-RES-Monopoly-Equation-for-Erin-Gleason-Lane_\(2-Nov-2020\).pdf](https://www.supereconomics.ai/11.37_S-RES-Monopoly-Equation-for-Erin-Gleason-Lane_(2-Nov-2020).pdf)

1 Page | 392 Words | 2nd Nov 2020 ★★★★★ ☆ ☆ ☆ ☆

Note the 4 shooting stars, that's as good as it gets so far, tallying up all the years from 2024 to

2080 and discounting them.

You will think there is a problem, god knows I did, the first version was written in 2012, and until 2019 I thought I was missing something, but then I realized that there is nothing wrong with it that cannot be explained away given the underlying assumptions.

Here's an easy one, easy but powerful, but still easy. Our prototype thought experiment based us in the country Malawi, in Africa, which was in 2018 the world's poorest country by GDP per capita at \$250 a year per person.

In macroeconomics, this system would cause massive inflation and currency corrections, cancelling out most of the effect.

This is true, but only if one works in local currency. So instead S-World companies abroad will all deal in US dollars, cash or more often bonds.

Problem solved.

This is one of the hundreds of necessary corrections, known as the underlying assumptions, the biggest stretch is called Tax Symmetry but even then, given the amount of money Malawi will make there's no way their government will say no. Or looking to the Western world I can see my home country of England adopting the model.

This next link is my main 'quick' presentation of Technology 7 <https://www.s-world.org/Library.php>. And here is a video of myself narrating it. www.AddVideo.com

In this video we see me shoot past the 100 or so documents listed from 2011 to 2021 with some but few occasional narrations until we arrive at the S-RES section which presents S-RES in a similar way to the one I made for you in 2020, but in dispersed by the library articles so one can easily find a lot more detail on specific points, in fact, that detail now stands at 1.25 million words on 6100 pages.

This is the pinnacle of this original presentation, the way I figure if I can get you to watch this video you will be impressed enough to begin a dialogue, be that you disagree with something I have said or that you can't fault a single line and need to get an expert's view. That's cool, but please make each person who views it their own login, you have the authorization to make new logins, just log out the site and when you log back in check the show CMS checkbox and you will see a new dropdown far right, called CMS, this is the CMS, choose Login Admin and then make as many logins as you like. You can also play with the CMS by adding a new dropdown menu and sub-menus in a really simple way, this is just one part of technology 1. S-Web, which is by far the simplest CMS out there, way simpler, a magnitude simpler than WordPress.

What next for us?

Well, ideally you can help me communicate with various people who can further the cause.

There is a giant chasm between me, a complete unknown, lone wolf, trying to communicate with target 'x', than you are as a professional at Pater Theil's VC.

Obviously, a deal would need to be done before you help me with this because any one of the people, I wish to communicate with would have their own VC contacts. So, let us for now imagine that we have made a deal, and you have been given the nod to lend your craft to this process.

For example

Paul Romer
Madonna
Richard Branson
Mr Farsi
Yale's
Roman Abramowitz
Leonard Susskind
Leonardo DiCaprio
Melinda Gates
Priscilla Chan
Sotheby's CEO
Andrew Golding
Stephan Antoni
David A Moss
Joseph Stiglitz
Richard h. Thaler
William Nordhaus
Poor Economics authors

And then there are the technology and political heavyweight contacts that are probably best left to Peter

Let me clarify, aside from developers I have hired and extra work for free from my lead developer Vineeth it's a solo project, that now yearns to work in a team, it's good to be a lone wolf sometimes, but that time has now past.

Addendums

In general, because of an initiative, Melinda Gates inspired I am where ever possible seeking not to work with white males, if you think the above videos need a more mathematical analysis maybe Leigh Marie Braswell or another non-white male can assist? By far the best way to get to know the Š-RÉŠ™ equation is a conversation, after having seen the video. As for economics, I'm sure you must have some experts in your ranks.

Meeting in person is hard because I'm in the UK and have spent everything I had on this project. Let me tell you my biggest fear, which is easy to fix, my biggest fear is another English winter, and my biggest ambition is to get to California.
